TEST TERMINAL BLOCK - UTILITY

JTTBU

JVS ELECTRONICS PVT. LTD.

#121, Manchanayakanahalli,
Bangalore Mysore Highway, Bidadi,
Ramanagara District - 562 109, Karnataka, India
+91 94808 26272, +91 94808 26260
bangalore@jvselectronics.in, www.jvselectronics.in

FEATURES

- ◆ Compact and Elegant design
- ◆ Ease of testing for the user
- ◆ Housing made out of non-inflammable & non hygroscopic phenolic compound
- ◆ High grade electrically conductive brass parts
- ◆ Very low contact resistance
- ◆ Available in both front and rear connection models choice can be made depending on customers need
- ◆ Transparent /opaque cover available

APPLICATION

Test terminal blocks (Commonly known as TTBs) are used in control panels and switch boards to enable testing of meters in an electrical circuit without physically disconnecting them. Generally, the test terminal blocks enable testing and calibration of devices such as meters, relays by authorized persons by simple linking and de-linking of connections without disconnection of any wires or power connections.

TECHNICAL DATA

Title	: Test Terminal Block - 3 Phase, 4 Wire
Type	: Rear Connection
Rating	: 1100V - 20A
